

SHENXIN

TO BELIEVE FIRMLY

COMPANY **PROFILE**

INTRODUCTION

SHENXIN INVESTMENTS was established in July of 2019, Shenxin is Chinese for 'TO BELIEVE FIRMLY', Ukukgolwa in Suthu. At SHENXIN we firmly believe in delivering world class construction and contract mining services across Zimbabwe and beyond. Our mantra of 'CONTINUAL IMPROVEMENT' is the epicenter of our belief in HOLOCRACTY, where everyone is afforded an opportunity to identify areas of growth, opportunity within the organization and proffer solutions which are constantly implemented and reviewed.

Since its inception, SHENXIN has grown exponentially into a multi-disciplinary civil engineering construction company and contract mining support services. SHENXIN continues to take great strides in addressing the country's infrastructure development agenda and the sustainable exploration and exploitation of Zimbabwe's vast mineral wealth. The company is dedicated to maintaining professional standards within the Civil Engineering Industry hence it is a Category A ranked member of CIFOZ, Ministry of Transport and Infrastructure Development and the Ministry of Local Government Public Works and National Housing. Throughout the project life cycle, we maintain the same tenacity to ensure we deliver services and products that matter and not only impact the client or community but also Shenxin.

SHENXIN employs an excess of 450 vibrant staff members and in support of socio-economic upliftment, additional human resources are recruited from the local communities within which our projects are located. The company is committed to Staff training and development.

OUR MISSION

SHENXIN endeavors to be a formidable provider of civil construction and contract mining support services. We are compelled by our desire to deliver client driven services through the continuous reinforcement of Total Quality Management in our processes to ensure value addition, value for money and a green footprint to sustain this age and generations to come.

OUR VISION

To be an internationally noteworthy civil and mining engineering contractor providing practical solutions to ensure balance of economic growth, social responsibility and environmental stewardship to our stakeholders by the year 2025.

OUR VALUES

People

Integrity

Transformation

Customer Care

Community

CORPORATE GOVERNANCE

SHENXIN's Corporate governance program is driven by our avidity to best serve the interests of our shareholders and various stakeholders with the highest standards of accountability, integrity and compliance to the laws of the land. These standards guide our board of directors who oversee the company's performance, actions and governance policies

HUMAN CAPITAL

SHENXIN's most profound investment is its human capital hence our first priority is ensuring the sound welfare of our staff. We believe in team work and ownership of our actions and results, which makes us an employer of choice amongst other players in the industry. At SHENXIN, no idea is worthless and insignificant thus we have set up robust staff training and development systems because we believe the brain's ability to learn and perform is infinite. Guided by the spirit of UBUNTU, our journey towards attaining ISO 9001:2015 Certification has been a joy as it is met across the board at SHENXIN with great enthusiasm and a great sense of ownership. We believe that at SHENXIN we set goals together, achieve them together, celebrate our successes together and cry for our losses together. Our staff motto "BE YOUR BROTHER'S KEEPER" has instilled a sense of belonging and camaraderie amongst all of us.

SHEQ

At SHENXIN, our safety, health, environment and quality (SHEQ) policy and practices are anchored in a 'MEASURE TWICE AND CUT ONCE' philosophy because we understand that our decisions and actions leave a footprint in the lives of our people, host communities and the environment. We ensure that the highest standards of safety, health and environment conservation are upheld on all our construction and mining sites.

SHENXIN has taken a zero-incident stance at all its sites and operations. Because we believe in total involvement of all levels of our organizational structure, Safety Health Environment and Quality are everyone's business

IMS ROAD TO CERTIFICATION

The yearning for excellence and quality is what pushed the organization to undertake this journey to getting certified for ISO 9001:2015, 14001:2015 and 45001:2018. Our ISO journey began in September 2021 and the company became certified for QMS in December 2022 and for EMS & OHS in November 2023. The Managing Director sought a team of competent professionals that were to lead the company through this road.

Like any other journey we were met with a few challenges. Our main hurdle being resistance from the employees. Changing organizational culture and implementing new systems is always difficult, however we are proud to say that we now move as one in-order to ensure the utmost standards and quality in all our operations and processes.

We all agree on delivering the best quality work to satisfy our customers. We owe our success in attaining this certificate to various stakeholders, the most important being our Shenxin family, who have improved and maintained the quality of our work, the internal audit team for leading this process and training everyone on the Integrated Management Systems, the internal audit team Chairperson, Mr G Choruma for his excellent leadership and last but definitely not the least the Managing Director Mr L. Manduku for the managerial support and having the foresight to ensure that the company reaches great heights.

SHEQ Policy Statement

SHENXIN specialises in road construction, mining support services, civil engineering works, geotechnical engineering works and hire of plant equipment. The company aims to develop, implement and maintain an occupational health and safety management system under ISO 45001:2018 guidelines, an environmental management system under ISO 14001:2015 and a quality management system under ISO 9001:2015. We are committed to the continual improvement of the safety, health, environmental and quality (SHEQ) performance within the SHENXIN organisation.

In pursuit of the above we endeavor to:

- Be committed to the satisfaction of relevant stakeholders through the provision of safe and healthy working conditions, sustainable use and protection of the environment and production of quality products and services according to the requirements of the Integrated Management System as specified in the standards ISO 45001:2018, ISO 14001:2015 and ISO 9001:2015 respectively.
- Ensure the fulfilment of applicable legal and other requirements governing SHEQ Management Systems within SHENXIN.
- Pursue promotion of safe working conditions through elimination of hazards, consistently consulting and engaging all workers on risk managements and any other pertinent issues.
- Encourage initiatives to optimize resource utilisation, water and solid waste management, protection of biodiversity and manage environmental pollution.
- Define responsibility and accountability to monitor SHEQ performance against set objectives and targets for continual improvement purposes.
- Ensure that the policy is communicated to and understood by all employees within the organization and all other relevant stakeholders.

OUR SERVICES

EARTH WORKS

Bulk earth works which involves bulk stock piling excavations, load and hauling operations across Zimbabwe. We have got a medium fleet to dozers, excavators and tippers that have been used in gravel stock piling, open cast chrome and coal mining.

ROAD SURFACING

Construction of different types of roads such as flexible pavements which are surfaced with bitumen, either spray and chip or hot or cold asphalt, rigged concrete pavements of different designs and gravel roads. Our work also includes road rehabilitation, drainage works, culverts, open drains, gabion walls, and concrete bridges. Our most recent works include reconstruction of the Harare Beitbridge road, Honde valley, Cyclone Idai road in partnership with the Ministry of Transport with the department of roads.

CONTRACT MINING

The significance of mining in human history can not be over stated and we at Shenxin have taken great cognizance of its importance to our growth and that of the country. We have over the years taken a solid stand in the provision of contract mining services and have participated in projects with some of the countries big mining corporations. Our services range from load and haul, open cast mining, drilling and blasting and day works on the leach pad as well as full mining services in gold, lithium and chrome.

PRETENSIONED & PRECAST CONCRETE PRODUCTS

The lack of pretensioned precast products in projects around the country resulted in the establishment of the pretensioned precast division to serve the needs of the market. We aim to be the leaders in production due to our reputation of service, technical excellence, efficiency, and unsurpassed quality.

We can manufacture any prestressed precast solution our clients may require.

Advantages of precast

- **Lowest whole life cost:** Contractor can spend less on forms, cranes, skilled labour and scaffolding and schedule the erection of an entire structure.
- **Efficiency:** Prestressed precast elements are manufactured under controlled conditions ensuring quality and tolerances.
- **Strong and durable concrete:** Fully cured members delivered to site contain little potential for additional shrinkage or creep.
- **Fast efficient all-weather construction**
- **Excellent fire performance**

PILING & GEO-TECHNICAL SERVICES

The geo-technical services we offer include the construction of various types of piles, geotechnical investigations and reports and lateral support in the most challenging geological environments. As an invaluable construction partner to our clients, we offer cost-effective construction solutions that save time and money but are of the best quality including:

- Pipejacking
- Piling and micro piling
- Auger piling
- Auger boring
- Geotechnical investigations and reports including diamond core drilling, DPSH testing and auger trial holes
- Grouting.

We undertake contracts for clients across all sectors within which SHENXIN operates including building, energy generation and industrial plants, mining, transport infrastructure i.e. roads, bridges rails as well as various water infrastructure.

We also have state of the art geo-technical plant. We own a geo-technical crawler mounted hydraulic piling rig suitable for:

- Auger piles
- Cased piles
- Continuous flight auger piles

OUR SERVICES

LAND DEVELOPMENTS

The company has become a leading brand in land development through Turnkey solutions based on PPP's. The solutions are delivered through partnership with other consultants, contractors local authorities, and financing partners. The land development model entails identifying urban land, entering into PPP's with local authorities, doing all designs, layout drawings, engineering drawings topographic surveys, our latest project being Neuport Housing Development.

ASPHALT PLANT

We own a fixed asphalt plant which is one of our most prized capital investments. Our plant has a daily output of 150 tonnes per day and has enabled us to be more cost effective in the construction of roads as we produce our own coated aggregates and asphalt. We did this for one of our completed projects on Glendale-Chiweshe Road. Not only have we managed to be more cost effective but we have helped other players in locally accessing inputs that they would have normally imported.

CRUSHING PLANT

Recycling of Layers, Road marking and Road Studs, Storm water Drainage, Subsurface Drainage Systems, Layer works, Surfacing, Roads Signs, etc

OUR SERVICES

BUILDING WORKS

As demand for our services has increased with clients asking us to take on greater roles in their projects, we set up a team of well experienced craftsmen and artisan in our building works section. To date we have undertaken complex residential complexes for clients who have world class taste and specifications.

ELECTRICAL SERVICES

Design and installation of the photovoltaic (PV) plant, including the solar panels, inverters, and associated electrical equipment, ensuring compliance with local regulations and industry standards.

Construction and commissioning of a high-voltage substation, including the installation of transformers, switchgear, protection systems, and control panels, to facilitate power distribution and grid connection.

Installation and integration of the overhead transmission line (OHTL) system, including the erection of transmission towers, stringing of conductors, and installation of insulators, ensuring reliable transmission of generated power.

Implementation of the electrical grounding system throughout the project site, including the design and installation of grounding electrodes, conductors, and associated components, to ensure safety and mitigate electrical hazards.

Provision of cable management systems, such as cable trays, conduits, and supports, for the efficient routing and protection of electrical cables across the site, ensuring proper organization and ease of maintenance.

Testing, commissioning, and performance verification of all electrical systems and equipment installed, including comprehensive inspections, functional tests, and adherence to performance specifications, to ensure reliable and efficient operation.

Documentation and training provision, including the preparation of as-built drawings, operation and maintenance manuals, and conducting training sessions for the client's personnel, to facilitate the safe and effective management of the installed electrical infrastructure.

PLANT HIRE

We hire our plant to the Private and Public Sector for bulk earth moving and dam construction. The mining sector hiring our equipment for works such as in gravel Stoke piling, ore haulage and loading to ensure that we deliver the best customer service.

OUR PROJECTS

NIEUPORT HOUSING DEVELOPMENT (28 HOUSING STANDS)

Shenxin was contracted by a private client to work on the Nieuport Housing Development, which involved the construction of 28 housing units with the contract valued at US\$ 145,246.12 . The scope of works involved the construction of internal roads which involved road base construction, stormwater drainage construction and road surfacing. The project also involved the construction of sewer line, water reticulation and electric distribution infrastructure for the houses.

Status: Completed

ZIMPLATS 35MW PV SOLAR PLANT CONSTRUCTION

Zimbabwe Platinum Mines (Private) Limited contracted Shenxin to undergo a project valued at US\$ 7,533,603.81. The scope of works encompasses the preparation and development of a 100-hectare site, specifically designed to meet the needs of the PV area. Additionally, the construction of 6.30 kilometres of gravel internal roads and the erection of buildings for the plant are included in the scope. Furthermore, the project entails the installation of the PV Plant, Substation, and Overhead Transmission Line (OHTL). To guarantee optimal performance, the scope incorporates thorough testing and commissioning of all project components, including the PV plant, substation, and OHTL.

Status: Ongoing

CHAMINUKA HOUSING DEVELOPMENT PROJECT (7000 HOUSE STANDS)

CBZ Holding (DATVEST) awarded Shenxin the land development project at Chaminuka for 7000 stands valued at US \$ 33,817,634.54. The project scope includes the construction of a 41km road network, which involves stormwater drainage construction, road base construction, and double seal surfacing. Additionally, the project includes sewer reticulation with a 39km pipeline route, water reticulation with a 69km pipeline route, street lighting installation, the implementation of a bulk water supply pipeline, and the construction of a water reservoir.

Status: Ongoing

OUR PROJECTS

SANDAWANA LITHIUM CONTRACT MINING

Shenxin was contracted by Sandawana Mines (Pvt) Ltd for a project valued at US \$ 71,400,000. The project scope includes the extraction of 70,000 tonnes of lithium ore per month whereby Shenxin will be responsible for the stockpiling of various grades and types of lithium ore into different distinct stockpiles and transportation to the crushing unit. Additionally, it involves the crushing of the lithium ore, construction and maintaining of temporary road and access ways within the working area. Status: Ongoing

JENA GOLD MINE

Shenxin has ongoing project experience in the Jena Gold Mine valued at USD \$7.4 million. The scope of work includes open cast mining, hauling broken rock, and access road maintenance. Shenxin is responsible for maintaining the roadway by managing drainage maintenance, spillage removal, dust allaying, and stockpile management. We are committed to providing quality workmanship and completing the project to the highest standards.

HOMESTAKE MINING

Homestake Mining and Technical Services contracted Shenxin to undertake a USD 2 million project that involves loading and hauling of broken rock from an open pit. Shenxin's scope of work also includes roadway maintenance such as drainage maintenance, spillage removal, and dust allaying, as well as stockpile management. The project is currently ongoing and Shenxin is committed to ensuring that the work is completed on schedule and within the agreed budget.

CYCLONE IDAI CHIMANIMANI ROAD REPAIRS

Fossil Contracting contracted Shenxin to carry out Cyclone Idai Chimanimani Road Repairs with a contract value of USD 570 thousand. The project included clearing flood rubble, construction of storm water drainage and culverts, and resealing. The project was successfully completed, and the road was restored to its former condition, allowing for safe and efficient travel.

BARRINGTON INKUBISI DEVELOPMENT PROJECT

Shenxin was contracted by CBZ Properties to

undertake site clearing and stand development for the Barrington Inkubisi Development Project in November 2020. The project involved the clearing of the site and the preparation of the land for the development of stands. The scope of works included site clearing, grading and leveling of the land, and the construction of necessary infrastructure such as access roads, drainage systems, and utilities. Shenxin successfully completed the project on time and within budget, delivering high-quality workmanship that met the expectations of the client. The value of the contract was USD 45,000.

MAHUWE ASPHALT LAYING

Shenxin was contracted by Fossil Contracting to undertake the Mahuwe Asphalt Laying project in September 2019. The project was valued at USD 5 million and involved several works, including culverts and concrete works, asphalt laying, and borrow pit reclaiming. The team worked diligently to ensure that all aspects of the project were executed with the highest level of quality and professionalism. The asphalt laying involved a comprehensive process of compacting and levelling, followed by the application of a durable asphalt layer. Additionally, culverts were installed and concrete works were carried out to ensure the longevity of the road. The project was completed on schedule, and the final result was a high-quality, durable road that will serve the community for years to come.

FREDA REBECCA GOLD MINE

Shenxin was contracted by Freda Rebecca Gold Mine to provide haulage of broken rock; shuttering and road maintenance services. The project involved transporting broken rock from the mine to designated areas for processing, as well as repairing and maintaining existing mine roads to ensure safe passage for heavy-duty vehicles. Shenxin also provided shuttering services for the mine's infrastructure development projects. The project was completed on time and within the allocated budget of USD 6 million.

OUR PROJECTS

PIONEER VILLA PROJECT 1

Shenxin was the main contractor for the Pioneer Villa 1 project, which had a contract value of USD3.4 million. The scope of works included road-site clearance, cut to spoil, fill and compaction, and hauling of spoil. The project was successfully completed within the stipulated timeframe.

HARARE-BEITBRIDGE ROAD PROJECT

Shenxin was sub-contractor for the Harare-Beitbridge Reclaiming and Widening project, which was valued at USD 8 million and commissioned by Fossil Contracting. The scope of works included shoulder widening, reclaiming the existing pavement, cement stabilization of the road base, construction of culverts and concrete works, asphalt laying, and borrow pit reclaiming. The project was successfully completed on time and within budget.

CYCLONE IDAI ROAD REPAIR PROJECT

Shenxin successfully completed the Cyclone Idai Honde Road Repairs project for Fossil Contracting. The project had a value of USD240 thousand and involved a range of activities including road reconstruction, culvert construction, vegetation control, drainage maintenance works, and clearing of flood rubble.

RESEALING OF GLENDALE CHIWESHE

Shenxin successfully completed the Resealing of Glendale Chiweshe Spray and Chip project for the Ministry of Transport. The project had a value of USD860 thousand and involved resealing spray and chip as well as edge drop repairs using compacted gravel. The scope of work involved a comprehensive approach, including the resealing of the spray and chip surfaces, repair of edge drops using compacted gravel, and ensuring a high-quality finish.

REGRAVELLING OF ALASKA

As the main contractor for the Ministry of Transport, Shenxin was responsible for the regravelling of the Alaska Copper Queen Road. The scope of work included road reconstruction, culvert construction, vegetation control, and drainage maintenance works. The project was completed successfully and had a value of USD 1.8 million.

PENALONGA

Shenxin was contracted by the Ministry of Transport to undertake the Penhalonga-Watsomba road regravelling project. The project involved clearing grass and bushes along the road, as well as regravelling it to improve its condition. Shenxin successfully completed the project, and it was considered a success by the Ministry of Transport. The total value of the contract was USD204,000.

BULAWAYO-NKAYI

As the Main Contractor for the Bulawayo Nkayi project, Shenxin has been contracted by the Ministry Of Transport and Infrastructural Development to undertake road works which includes culvert construction, base construction and double seal surfacing. The project is ongoing, and the total value of the contract is USD5.5 MILLION.

BINDURA-DARWIN

As the main contractor for the Ministry of Transport and Infrastructural Development, Shenxin is currently involved in the Harare-Bindura-Mt Darwin-Mukumbura project. The scope of work includes resealing spray and chip and edge drop repairs using compacted gravel. The contract value is USD1.46 million, and the project is still ongoing.

HARARE-GWERU

Shenxin is currently serving as the main contractor for the Harare-Gweru Dualisation project, which

OUR PROJECTS

involves a wide range of road construction activities. Some of the main tasks include shoulder widening, reclaiming existing pavement, cement stabilization, culverts and concrete works, asphalt laying, and borrow pit reclaiming. The project is currently ongoing and expected to be completed in the future. The project is valued at US\$3.3 million.

WEST NICHOLSON

As the main contractor for the West Nicholson Mberengwa project, Shenxin was contracted by the Ministry of Transport and Infrastructural Development (MOTID) to undertake resealing spray and chip works, and edge drop repairs using compacted gravel. The project was successfully completed within the stipulated timeline and budget, with a contract value of USD1.7 million.

TONGOGARA-CHACHACHA

As the main contractor, Shenxin was responsible for the Tongogara-Chachacha project, which involved the construction of a detour, scarifying and compaction of the existing road, construction of culverts, stabilization of base 1, and double seal surface pavement. The project had a value of \$4 million and was completed for a private client.

PIONEER VILLA

As the contractor for Pioneer Villa 2, Shenxin was responsible for the bulk earth works of the project. The scope of works included excavation, grading, and leveling of the site. The project was completed successfully, and the value of the contract was USD280 thousand.

MANAGEMENT TEAM

Lovejoy Manduku

Managing Director

ACCA

Bsc (Hons) OT (UZ)

BSc (Hons) Applied Accounting (Oxford Brookes)

The Founding Managing Director of SHENXIN, Lovejoy has vast experience in Healthcare management, Agri-business management and Construction management in both Zimbabwe and the United Kingdom. His passion and acumen has molded SHENXIN into one of the fastest growing Civil and Mining engineering contractors and an employer of choice in the Industry.

Ruvimbo Muskwe

Finance & Admin Manager

Bsc (Hons) Accounting (UZ), ACCA

Thrives for professionalism, integrity and fairness. Has experience in both business and tax consultancy

Simbarashe Makumbe

Human Capital Development Manager

B. Tech (Hons) Human Resources Management (DUT)

Wisdom Chawawa

Engineering Manager - Civils

Bsc (Hons) Civil Engineering (UZ)

Diverse Construction Management experience covering Energy, Transportation infrastructure, Housing Service Infrastructure and water sanitation Prior to joining SHENXIN, Wisdom worked as Projects Engineer for the IDBZ. He is responsible for managing the Civil projects department and for spearheading the implementation of the organization's construction projects

Dominico Sibanda

Operation Manager - Mining

MBA,

Mining Engineering Diploma,

MDP, Success Motivation Certificate(USA).

Taproot investigation Certificate.

Member of the Southern African Institute of Mining and Metallurgy. Examiner for Full Blasting Licence. 36 years Mining Experience.

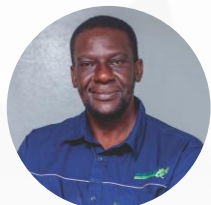

MANAGEMENT TEAM

Cynthia Matondo

Executive Assistant

LLB Honors
Masters in Business Administration

Tawanda Ntando

Plant Manager

Bachelor of Business Administration Accounting, Solusi University

Gerald Choruma

QA-QC Manager

Bsc (Hons) Geography and Environmental Studies (ZOU)
OSHMACH I, II (NSSA)
ISO 45000:2018 (SAZ)
Occupational Safety and Health Management Systems Development and Implementation (SAZ)
ISO 9001:2015 (SAZ)
Quality Management Systems Development and Implementation (SAZ)
Internal Audit (SAZ), Documentation (SAZ)

Fatima Mugwadi

SHEQ Manager

Post graduate diploma in SHE
Bachelor of arts degree
OSHEMAC certificate and IMS Auditing certificates
14001 & 45001 Internal Audit and Development and Implementation

Munyaradzi Masaga

Manufacturing Manager

MBA (NUST), B.Comm (Hons) Business Management (MSU)

Tamuka Mutiti

Commercial Manager

Bsc (Hons) Quantity Surveying (UCEM)
Esteemed Member of the Institute of Namibian Quantity Surveyors
Esteemed Member of the Royal institute of Chartered Surveyors.

Kelton Chiwenga

Projects Engineer
